OUR MISSION

Asian Women Advancing AI is dedicated to fostering a supportive environment for Asian women in artificial intelligence. We focus on mentorship, skill development, and networking opportunities to elevate our members. Our mission is to create a community that encourages visibility and participation of Asian women in the AI field, ultimately driving inclusivity and innovation.

WHY AWAAI at UNCC

The UNC Charlotte chapter of AWAAI is established to create a supportive community for Asian women in AI, fostering mentorship and professional growth.

At UNCC, 9.2% of the women community identify as Asian, highlighting the importance of creating inclusive spaces for representation and support.

Thank you
